

Dear Sirs,

XM Radio is providing entertaining programming, especially for those of us raised in the 60's and 70's. We have difficulty finding local radio programming that suits our tastes, and takes us back to our glorious youth.

XM is attempting to also provide us with local weather and traffic information, which is a valuable service in our area where hurricanes occur and knock local radio and TV off the air.

Please reject the NAB's petition 04-160 to allow the continuation of the pleasurable and safety information that XM provides.

I have been a subscriber, listener, and stock owner since 2002. Please allow XM to continue their innovative and forward-thinking processes.

Radio attempted to squash TV in its inception, AM radio attempted to prohibit FM broadcasting in its infancy...you did not allow these monopolies, so please allow the continued development of this new generation of innovation in entertainment to grow and prosper.

Sincerely,

Toni Olivier
